

# Curriculum Fair

Every year MORT 11 participates in the curriculum fair hosted at our very own Mount Olive High School. The fair is meant to promote the electives and extracurricular activities provided at our school. While communicating with incoming freshman, along with interested parents, MORT members performed a robot demonstration while giving information about the FIRST program and what MORT has to offer. The fair is a great way to share the ideas of STEM within our community, but it is also a great way to recruit new members for our team.
